

# LOVE, TRUST AND PROTECT GET VACCINATED AGAINST COVID-19

## FIVE THINGS YOU SHOULD KNOW ABOUT COVID-19 VACCINE ADULTS OVER 65 YEARS OLD

### SECURITY

Safety of the COVID-19 vaccine is the highest priority. No steps are skipped during the clinical trial process.

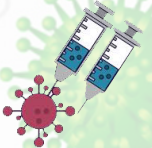

### HOW THE COVID-19 VACCINE WORKS

The vaccine does not contain active virus and cannot infect anyone with COVID-19.

### BENEFITS

The vaccine can help prevent you, your family, and those around you from getting infected.

### NUMBER OF NECESSARY DOSES

The first COVID-19 vaccines (Pfizer and Moderna) will require two doses and you will have to receive both to get the best protection the vaccine can offer.

### AVAILABILITY AND COST

Certain groups will be given priority to receive the vaccine first. The COVID-19 vaccine will be offered at no cost to anyone in Pinellas County who wants it as soon as it becomes available in greater quantities.

**We must also continue to comply with CDC recommendations, stay at home as much as possible, wear masks, and wash hands frequently.**

Vaccines play an important role in keeping a person in preparing the body's immune system to recognize germs and fight infections.

The Health Department is managing the distribution process and implementation plan for COVID-19 vaccines in accordance with guidance from the Centers for Disease Control (CDC).
