

Oceans of Fun!

Marine Biology Summer camp

June 14th – August 6th

Our Girls Inc 2021 Oceans of Fun | Marine Biology STEAM Summer Camp will welcome girls from throughout Pinellas County to enjoy programming that includes investigating water and discovering how its unique properties shape our oceans, its currents, and its biomes both under the sea and at the beach. Girls will also learn about marine life and explore food webs and marine adaptations. We will round out the summer by looking at humankind's impact on the ocean as a whole.

All girls will also participate in GirlSMART Reading program, a Girls Inc National Literacy initiative, as well as the United Way Summer Bridge program, designed to foster a love of reading, improve literacy skills and reduce summer learning loss.

Open to all girls ages 5-18.

\$125 per week.* ELC accepted.

Includes breakfast, lunch, snacks, t-shirt and field trips.

Inspiring girls to be strong, smart and bold
7700 61st Street North
